Chicago, IL 60602

## Certification of Actuarial Valuation

Ladies and Gentlemen:

This report represents the results of the annual valuation of the assets and liabilities of The Retirement Plan for Chicago Transit Authority Employees ("the Plan") as of January 1, 2016, prepared in accordance with 40 ILCS 5/22-101(e). In addition it includes disclosure information as of December 31, 2015, as required under GASB Statement No. 67. The actuarial valuation of the Plan is performed annually and Buck Consultants was retained to perform the valuation as of January 1, 2016. This valuation has been conducted in accordance with all applicable Actuarial Standards of Practice (ASOPs) issued by the Actuarial Standards Board (ASB).

This report is revised from the original version sent in October of 2016 to update the Section 3 exhibits.

The actuarial valuation is based on unaudited financial and member data provided by the staff of the plan and summarized in this report. The benefits considered are those delineated in the plan and is governed by legislation contained in the Illinois Compiled statutes, particularly Chapter 40, as amended and restated effective December 31, 2012. The actuary did not verify the data submitted, but did perform tests for consistency and reasonableness.

Public Act 95-708, effective January 18, 2008, requires that the Plan's pension and retiree health care programs be separated into two distinct trusts by July 1, 2009 (40 ILCS 5/22-101B(a)). This January 1, 2016 valuation report for the Plan does not reflect the liabilities and assets that were spun off into the healthcare trust.

Contribution rates were determined in accordance with 40 ILCS 5/22-101(e) using the projected unit credit cost method and provide for a funded ratio of at least 60 percent no later than ten years after the implementation year (2015) through fiscal year end 2039. Contribution rates reflect the issuance of bond or notes by the Authority, as defined in 70 ILCS 3605/12c. Authority contribution rates are adjusted by a debt service credit, for debt service paid in the prior year, of up to six percent of compensation per year from 2009 to 2040, as defined in 40 ILCS 5/22-101(e)(2).

Results of this valuation deviated from what was expected based on the January 1, 2015 actuarial valuation for a number of reasons including market returns of $-0.2 \%$ compared to $8.25 \%$ assumed and payroll and salaried increases that were less than expected. Overall these events caused the funded ratio to not meet the standards
set forth in ILCS 5/22-101(e) and therefore there is a need to increase authority and employee contribution rates to comply with 40 ILCS 5/22-101(e) as follows:

| Fiscal Year | Annual Contributions to the Plan (Percentage of Compensation) |  |
| :---: | :---: | :---: |
|  | Authority | Employees |
| 2017 to 2040 | $17.925 \%$ | $11.962 \%$ |

Based on these rates, the sum of current assets, net bond proceeds, future contributions and investment earnings, less benefit payments and expenses, the Plan is projected to be at least equal to 60 percent of actuarial liabilities by 2025 and through fiscal year end 2040, if these contributions, expressed as a percentage of compensation, are made to the Plan and the Plan experiences no net actuarial losses in the future.

40 ILCS 5/22-101(e)(4) provides for a minimum contribution, determined either by the Board of Trustees or the Auditor General, to bring the funded ratio of the Plan "up to" or "no less than" $90 \%$ by December 31, 2059. Thus, the attached schedules contain such projected funded ratios.

While not required by 40 ILCS 5/22-101(e)(3), Buck has recommended that the Board of Trustees consider, as appropriate, moving towards contributing an amount equal to the Actuarial Math Contribution.

- Fund $100 \%$ of the entry age normal cost method
- Use an actuarial value of assets to help mitigate contribution volatility
- Pay off the unfunded liability over 20 years using layered amortization

This methodology suggests a contribution of approximately $34.04 \%$ (total contribution). The rates adopted by the Board pursuant to its ten-year plan are higher than the minimum required by 40 ILCS 5/22-101(e)(3). We understand that the Board anticipates an annual review of rates during the ten-year period.

The results documented in this report are estimated based on data that may be imperfect and on assumptions about future events. Assumptions may have been made about participant data or other factors. Reasonable efforts were made in this valuation to ensure that items that were significant in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately. We believe that the use of approximation in our calculations, if any, has not resulted in a significant difference relative to the results we would have obtained using more detailed calculations.

A range of results, different from those presented in this report could be considered reasonable. The numbers are not rounded, but this is for convenience only and should not imply precision, which is not inherent in actuarial calculations.

This valuation was based on the actuarial assumptions and methods as approved by the Board of Trustees. Please see Section 6.2 and 6.3 of this report for a description of the assumptions and methods used. Actuarial Standards of Practice now require that the likelihood and extent of future mortality improvements be considered for valuations performed on or after June 30, 2011. Traditionally for the CTA Retirement Plan, experience studies are performed once in every five year period. Our initial conclusion is that the mortality tables currently in use
and adopted by the Board provides for some future mortality improvements. The most recent study of the plan's experience, used in developing the current actuarial assumptions, was based on a period from January 1, 2008 December 31, 2012 and first used with the January 1, 2014 actuarial valuation; the next review will cover the period from January 1, 2013 through December 31, 2017. The interest rate of $8.25 \%$ has been approved by the Board of Trustees. It is based upon a review of the existing portfolio structure, a review of recent experience, and future long-term expectations of rates of return. We believe that the economic and demographic assumptions adopted in accordance with the recent experience study and a review of recent experience are reasonable and appropriate for the purposes of this valuation.

All assumptions and methods used for this valuation are unchanged from the prior valuation.
The assumptions and methods used to determine the Actuarial Math Contribution of the Plan as outlined in this report and all supporting schedules meet the parameters and requirements for disclosure of Governmental Accounting Standards Board (GASB) Statement No. 67, Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans. Based on member data and asset information provided by the CTA Retirement Plan staff, we have prepared the Schedule of Funding Progress and Schedule of Employer Contributions that are included in the Financial Section of the Comprehensive Annual Financial Report. Because of the risk of misinterpretation of actuarial results, you should ask us to review any statement you wish to make on the results contained in this report. Buck will accept no liability for any such statement made without our prior review.

Future actuarial measurements may differ significantly from the current measurement presented in this report due to such factors as: plan experience different from that anticipated by the economic and demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements; and changes in plan provisions or applicable law. Due to the limited scope of this report, an analysis of the potential range of such future measurements has not been performed.

Please note that GASB Statement No. 25 (Financial Reporting for Defined Benefit Pension Plans) is applicable for fiscal years ending prior to 2014 and has been replaced by GASB Statement No. 67 (Financial Reporting for Pension Plans) for fiscal years ending 2014 and later. Similarly, GASB Statement No. 27 (Accounting for Pensions by State and Local Governmental Employers) is applicable for fiscal years ending prior to 2015 and has been replaced by GASB Statement No. 68 (Accounting and Financial Reporting for Pensions) for fiscal years ending 2015 and later. We have prepared the required accounting information for Governmental Accounting Standards Board (GASB) Statement No. 67 for the fiscal year ending December 31, 2015 based on a valuation dates of December 31, 2014 and December 31, 2015.

All of the historical valuation results presented in this report represent results taken from prior actuarial reports and some years may reflect the funding methods and techniques used by the prior actuary. Our report/certification does not apply to those results other than to represent that our report has presented accurate information developed by prior actuaries.

Qualified actuaries completed the valuation in accordance with accepted actuarial procedures as prescribed by the Actuarial Standards Board. The qualified actuaries are members of the American Academy of Actuaries and are experienced in performing actuarial valuations of public employee retirement systems. To the best of our knowledge, this report is complete and accurate and has been prepared in accordance with generally accepted actuarial principles and practice. The undersigned with actuarial designations is qualified to render the opinions contained in this report and is available to respond to any questions you may have.

In our opinion the calculations also comply with Illinois law and where applicable, federal laws such as the Internal Revenue Code, and the Statements of the Governmental Accounting Standards Board. We certify that the information presented herein is accurate and fairly portrays the actuarial position of the Plan as of January 1, 2016.

Respectfully submitted,

## BUCK CONSULTANTS, LLC

Larry Langer, ASA, MAAA, EA
Principal and Consulting Actuary

## Executive Summary

## Overview

The Retirement Plan for CTA Employees provides pension and ancillary benefit payments to the retired, disabled and terminated employees of the Chicago Transit Authority. A Board of Trustees comprised of appointed representatives is responsible for administering the Plan and making investment decisions. This report presents the results of the actuarial valuation of the Plan benefits as of the valuation date of January 1, 2016.

## Purpose

An actuarial valuation is performed on the retirement plan annually as of the beginning of the fiscal year. The main purposes of the actuarial valuation detailed in this report are:

1. To certify the statutory contribution requirements for plan year 2016, as required under 40 ILCS 5/22101(e)(3);
2. To disclose the funding assets, liability measures and funded ratio as of the valuation date;
3. To disclose the accounting measures for the Plan required by GASB No. 67 as of the end of the last fiscal year;
4. To compare actual and expected experience under the Plan during the last fiscal year;
5. And to report trends in contributions, assets, liabilities, and funded status over the last several years.

Because of the risk of misinterpretation of actuarial results, you should ask us to review any statement you wish to make on the results contained in this report. Buck will accept no liability for any such statement made without our prior review. This actuarial valuation provides a "snapshot" of the funded position of the Plan based on the Plan provisions, membership, assets, and actuarial assumptions as of the valuation date. Actuarial projections are also performed to provide a long-term view of the expected future funding status and contribution patterns.

## Membership

Actives: As of January 1, 2016, there were 8,204 members in active service covered under the provisions of the Plan. The significant age, service, salary and accumulated contribution information for these members is summarized below, along with comparative figures from the last actuarial valuation one year earlier.

|  | January 1, 2016 | January 1, 2015 |
| :--- | ---: | ---: |
| Number of active employees $^{1}$ | 8,204 | 8,251 |
| Average age | 48.4 | 48.2 |
| Average years of service | 13.7 | 13.8 |
| Total annual valuation salary $^{2}$ | $573,548,196$ | $564,827,965$ |
| Average annual salary ${ }^{2}$ | 70,331 | 68,923 |
| Total accumulated contributions $_{\text {Average accumulated contributions }}$ | $417,390,393$ | $379,907,286$ |
|  | 51,182 | 46,358 |

1 Active statistics include all participants who are actively employed which includes 19 participants who are on leave and 49 participants who have opted out of participating in the Plan and are only entitled to a return of their contributions.

2 The salary information for the 49 participants $w$ ho have opted out of participating in the Plan is not included.

The number of active members decreased by $0.6 \%$ from the previous valuation date. The average age of the active members increased by 0.2 years, and the average service decreased by 0.1 years. The total annual valuation salary increased by $1.5 \%$. The average salary increased by $2.0 \%$ from the previous valuation.

Distributions of active members by age and service are given in Section 5.2.

Inactives: In addition to the active members, there were 98 inactive vested members who did not elect to receive their accumulated contributions when they left covered employment. The significant age and annual benefit information for these inactive members is summarized below with comparative figures from the last actuarial valuation one year earlier.

|  | January 1, 2016 | January 1, 2015 |
| :--- | ---: | ---: |
| Number of inactive members | 98 | 103 |
| Average age | 56.7 | 56.4 |
| Average annual benefit payments | $\$ 26,737$ | $\$ 25,773$ |

The number of inactive vested members decreased by $4.9 \%$ from the previous valuation. The average age of the inactive vested members increased by 0.3 years. The Average Monthly Pension Benefit for these members increased by $3.7 \%$ from the previous valuation.

Distributions of inactive members by age and pension benefit are given in Section 5.4.

Retirees and Beneficiaries: In addition to the active and inactive members, there were 7,991 retired members, 1,159 members with disability allowances and 878 beneficiaries who are receiving monthly benefit payments on the valuation date. The significant age and annual benefit information for these members are summarized below with comparative figures from the last actuarial valuation performed one year earlier.

|  | January 1, 2016 | January 1, 2015 |
| :---: | ---: | ---: |
| Number of members receiving payments |  |  |
| $>$ Retirees | 7,991 | 7,886 |
| $>$ Disability Allowances | 1,159 | 1,102 |
| $>$ Beneficiaries | 878 | 902 |
| $>$ Total | 10,028 | 9,890 |
| Average age | 70.0 | 69.7 |
|  |  |  |
| Annual benefit amounts |  | $218,549,877$ |
| $>$ Retirees | $224,664,030$ | $17,430,033$ |
| $>$ Disability Allowances | $18,714,100$ | $9,985,487$ |
| $>$ Beneficiaries | $9,871,344$ | $245,965,397$ |
| $>$ Total | $253,249,474$ | 24,870 |

The number of retired members and beneficiaries increased by $1.4 \%$ from the previous valuation date. The average age of these members increased by 0.3 years. The total annual benefit payments for these members increased by $3.0 \%$ from the previous valuation date.

Distributions of retired members by age and benefit amounts are given in Section 5.3.

In our opinion, the membership data collected and prepared for use in this actuarial valuation meets the data quality standards required under Actuarial Standards of Practice No. 23.

## Plan Assets

The Plan's assets are held in trust and invested for the exclusive benefit of plan members. The trust is funded by member and employer contributions, and pays benefits directly to eligible members in accordance with plan provisions. The assets are audited annually and are reported at fair value. On a fair value basis, the Plan has Net Assets Available for Benefits of $\$ 1,743.2$ million as of January 1, 2016. This includes a decrease of $\$ 112.7$ million over the Net Assets Available for Benefits of $\$ 1,855.9$ million as of January 1, 2015. During the prior year, the investment return was $-0.2 \%$ as reported by the Plan.

Starting with the January 1, 2012 valuation, the Board of Trustees adopted the market value of assets to determine the actuarial value of assets used for funding purposes. This method recognizes gains and losses, i.e. the difference between actual investment return during the year and the expected return based on the valuation interest rate, immediately.

A summary of the assets held for investment, a summary of changes in assets, and the development of the actuarial value of assets is shown in Section 2.

## Actuarial Experience

Differences between the expected experience based on the actuarial assumptions and the actual experience create changes in the actuarial accrued liability, actuarial value of assets, and the unfunded actuarial accrued liability from one year to the next. These changes create an actuarial gain if the experience is favorable and an actuarial loss if the experience is unfavorable. The Plan experienced a total net actuarial loss of $\$ 167.5$ million during the prior year. This net loss is about $5.3 \%$ of the plan's prior year actuarial accrued liability. The net loss is a combination of two principal factors, demographic experience and investment performance.

The demographic experience tracks actual changes in the plan's population compared to the assumptions for decrements such as mortality, turnover, and retirement, as well as pay increases. The Plan experienced a demographic loss of $\$ 20.9$ million during the year ending December 31, 2015. This loss increased the unfunded actuarial accrued liability by $\$ 20.9$ million and decreased the funded ratio by $0.3 \%$.

Continued tracking of the demographic experience is warranted in order to confirm the appropriateness of the actuarial assumptions. Details of the demographic, economic, and other assumptions used to value the plan liabilities and normal cost can be found in Section 6. In our opinion, the economic assumptions comply with Actuarial Standards of Practice No. 27 and the demographic assumptions comply with Actuarial Standards of Practice No. 35.

On the asset side, the Plan experienced a loss on an actuarial value of assets basis. The actual rate of return on the actuarial value of plan assets was $-0.2 \%$ for the year ending December 31,2015 compared to the assumption of $8.25 \%$, resulting in a loss of $\$ 146.6$ million. This loss increased the unfunded actuarial accrued liability by $\$ 146.6$ million and decreased the funded ratio by $4.5 \%$.

A summary of the actuarial gains and losses experienced during the prior year is shown in Section 1.4.

## Funded Status

The funded status is a measure of the progress that has been made in funding the plan as of the valuation date. It is determined as a ratio of the actuarial value of assets divided by the total actuarial accrued liability on the valuation date. A ratio of over 100\% represents a plan that is ahead in funding, and a ratio of less than 100\% represents a plan that is behind in funding on the valuation date. The funded ratio presented is appropriate for evaluating the need and level of future contributions but makes no assessment regarding the funded status of the plan if the plan were to settle (i.e. purchase annuities) for a portion or all of its liabilities.

As of January 1, 2016 the funded ratio of the Plan is $53.3 \%$. This represents a decrease of $4.9 \%$ from last year's funded ratio of $58.2 \%$ as of January 1,2015 . Unless otherwise noted, the funded status shown in the report is based on the projected unit credit cost method.

A history of the unfunded actuarial accrued liability and the funded ratio is shown in Section 1.5.

## Actuarial Math Contributions

Actual required contribution rates were determined in accordance with 40 ILCS 5/22-101(e) using the projected unit credit cost method and provide for a funded ratio of at least 60 percent no later than ten years after the implementation year (2015) through fiscal year end 2039 and 90 percent funding by fiscal year end 2059. Contribution rates reflect the issuance of bond or notes by the Authority, as defined in 70 ILCS 3605/12c. Authority contribution rates are adjusted by a debt service credit, for debt service paid in the prior year, of up to six percent of compensation per year from 2009 to 2040, as defined in 40 ILCS 5/22-101(e)(2).

While not required by 40 ILCS 5/22-101(e), white papers on funding policies for public sector plans developed over the past few years suggest a funding policy be sufficient to pay the normal cost on the entry age normal cost basis and amortize the unfunded actuarial accrued liability over a fixed period of 20 years. We will broadly refer to this type of policy as an Actuarial Math Funding Policy. Buck has recommended that the Board of Trustees consider, as appropriate, moving towards contributing based on the Actuarial Math Funding Policy. The rates adopted by the Board pursuant to its ten-year plan are higher than the minimum required by 40 ILCS 5/22101(e)(3). We understand that the Board anticipates an annual review of rates during the ten-year period.

Under Actuarial Math, the normal cost represents the cost of the benefits that accrue during the year for active members under the Entry Age Normal Cost Method. It is determined as a level percent of pay over each individual career attributable to the respective plan year. The normal cost for 2016 has been determined to be $\$ 52.2$ million, or $9.09 \%$ of pay. This represents a decrease in the normal cost rate of $.94 \%$ of pay from last year's normal cost rate of $10.03 \%$, primarily attributable to an increase in the average age of the active participant group.

Under Actuarial Math, the cost method under which the actuarial accrued liability is determined is the entry age normal cost method. Under the entry age normal cost method, the actuarial accrued liability (AAL) is equal to the present value of projected benefits less the present value of future benefits to be accrued. The AAL amount is compared to the actuarial value of assets to determine if the Plan is ahead or behind in funding as of the valuation date. The difference between the total actuarial accrued liability and the actuarial value of assets equals the amount of unfunded actuarial accrued liability or surplus (if negative) on the valuation date. This amount is amortized and added to the normal cost to determine the annual required contribution for the year suggested by public sector funding policy white papers.

The unfunded actuarial accrued liability under the entry age normal cost method as of January 1, 2016 is $\$ 1,632.2$ million. This represents an increase of $\$ 192.7$ million in the unfunded actuarial accrued liability from last year's amount of $\$ 1,439.5$ million. The annual payment required to amortize the unfunded actuarial accrued liability of $\$ 1,632.2$ million as of January 1,2016 is $\$ 135.5$ million, or $23.62 \%$ of pay.

The total contribution suggested by actuarial math is the sum of the normal cost and the payment to the UAAL, or 34.04\% of pay.

The actuarial liabilities and development of the Actuarial Math Contribution is shown in the Comparative Summary and Section 1.1.

In our opinion, the measurement of the benefit obligations and determination of the actuarial cost of the Plan is performed in compliance with Actuarial Standards of Practice No. 4.

## Accounting Information

The Governmental Accounting Standards Board (GASB) issues statements which establish financial reporting standards for defined benefit pension Plans and accounting for the pension expenditures and expenses for governmental employers. The required financial reporting information for the Plan and the Employer under GASB No. 67 can be found in Section 3 beginning on page 26.

## Projections

As part of the annual actuarial valuation, a forecast of expected future valuation results is performed over a 50 year period beginning on the valuation date. This analysis provides a dynamic look into the future to identify trends in future employer contributions and funded status. The forecast replaces active members who are assumed to decrement (terminate, retire, etc.) during the period with new members resulting in a stable active membership. The forecast assumes all actuarial assumptions are exactly realized each year during the forecast period. The results of these forecasts can be found in Section 4.

## Changes in Plan Provisions

There have been no significant changes in the plan provisions which changed the meaning of the Plan according to Plan Counsel since the last actuarial valuation performed as of January 1, 2015.

## Changes in Actuarial Assumptions, Methods, or Procedures

There have been no changes in the actuarial assumptions, actuarial cost method, asset valuation method or valuation procedures since the last actuarial valuation performed as of January 1, 2015.

## Comparative Summary of Key Actuarial Valuation Results

Actuarial Funding Results

## Section 1.1 - Actuarial Liabilities and Normal Cost

| Actuarial Accrued Liability | January 1, 2016 | January 1, 2015 |
| :--- | ---: | ---: |
| 1. Active Members |  |  |
| a. Retirement Benefits | $976,491,538$ | $945,335,933$ |
| b. Withdrawal Benefits | $23,630,028$ | $23,908,707$ |
| c. Disability Benefits | $35,834,510$ | $35,896,921$ |
| d. Death Benefits | $15,032,557$ | $14,519,552$ |
| Total | $1,050,988,633$ | $1,019,661,113$ |
| 2. Inactive Members with Deferred Benefits | $13,413,910$ | $13,162,759$ |
| 3. Retired Members and Beneficiaries Receiving Benefits | $2,202,718,093$ | $2,153,362,801$ |
| 4. Total Actuarial Accrued Liability (1. + 2. + 3.) | $3,267,120,636$ | $3,186,186,673$ |

| Normal Cost | January 1, 2016 | January 1, 2015 |
| :--- | ---: | ---: |
| 1. Active Members |  |  |
| a. Retirement Benefits | $53,679,623$ | $52,410,522$ |
| b. Withdrawal Benefits | $2,690,808$ | $2,635,071$ |
| c. Disability Benefits | $2,991,145$ | $2,968,823$ |
| d. Death Benefits | $1,110,701$ | $\mathbf{1 , 0 6 5 , 0 4 3}$ |
| 2. Normal Cost (Dollar amount) | $\mathbf{6 0 , 4 7 2 , 2 7 7}$ | $\mathbf{5 9 , 0 7 9 , 4 5 9}$ |
| 3. Total Normal Cost (As a \% of pay) | $\mathbf{1 0 . 5 4 \%}$ | $\mathbf{1 0 . 4 6 \%}$ |

## Section 1.2 - Actuarial (Gain) / Loss

| Development of Actuarial (Gain) / Loss | Amount |
| :---: | :---: |
| 1. Expected Actuarial Accrued Liability <br> a. Actuarial Accrued Liability at January 1, 2015 <br> b. Normal Cost at January 1, 2015 <br> c. Interest on a. + b. to End of Year <br> d. Benefit Payments and Administrative Expenses for 2015, with Interest to End of Year <br> e. Expected Actuarial Accrued Liability Before Changes (a. + b. + c. - d.) <br> f. Change in Actuarial Accrued Liability at January 1, 2016 due to Change in Actuarial Assumptions <br> g. Change in Actuarial Accrued Liability at January 1, 2016 due to Change in Plan Provisions <br> h. Expected Actuarial Accrued Liability at January 1, 2016 (e. + f. + g.) | $\begin{array}{r} 3,186,186,672 \\ 59,079,459 \\ 267,734,456 \\ 266,730,534 \\ 3,246,270,053 \\ 0 \\ 0 \\ 3,246,270,053 \end{array}$ |
| 2. Actuarial Accrued Liability at January 1, 2016 | 3,267,120,637 |
| 3. Liability (Gain) / Loss (2. - 1.h.) | 20,850,584 |
| 4. Expected Actuarial Value of Assets <br> a. Actuarial Value of Assets at January 1, 2015 <br> b. Interest on a. to End of Year <br> c. Contributions Made for 2015 <br> d. Interest on c. to End of Year <br> e. Benefit Payments and Administrative Expenses for 2015, with Interest to End of Year <br> f. Change in Actuarial Value of Assets at January 1, 2016 due to Change in Method <br> g. Expected Actuarial Value of Assets at January 1, 2016 (a. + b. + c. + d. - e. - f.) | $\begin{array}{r} 1,855,912,051 \\ 153,112,744 \\ 141,793,202 \\ 5,733,068 \\ 266,730,534 \\ \underline{0} \\ 1,889,820,531 \end{array}$ |
| 5. Actuarial Value of Assets as of January 1, 2016 | 1,743,216,432 |
| 6. Actuarial Asset (Gain) / Loss (4.g. - 5.) | 146,604,099 |
| 7. Actuarial (Gain) / Loss (3. + 6.) | 167,454,683 |

Section 1.3 - Actuarial Balance Sheet

| Financial Resources | January 1, 2016 | January 1, 2015 |
| :---: | :---: | :---: |
| 1. Actuarial Value of Assets (market) | 1,743,216,432 | 1,855,912,051 |
| 2. Present Value of Future Contributions | 511,755,531 | 508,866,647 |
| 3. Unfunded Actuarial Accrued Liability/(Reserve) | 1,523,904,205 | 1,330,274,621 |
| 4. Total Assets $(1+2+3)$ | 3,778,876,168 | 3,695,053,319 |
| Benefit Obligations | January 1, 2016 | January 1, 2015 |
| 1. Present Value of Future Benefits |  |  |
| a. Active Members | 1,562,744,165 | 1,528,527,759 |
| b. Inactive Members | 13,413,910 | 13,162,759 |
| c. Retirees, disabilities and beneficiaries | 2,202,718,093 | 2,153,362,801 |
| d. Total | 3,778,876,168 | 3,695,053,319 |

## Section 1.4 - Analysis of Financial Experience

## Analysis of Actuarial (Gains) and Losses

## Resulting From Differences Between Assumed Experience and Actual Experience

| Type of (Gain) or Loss | Year End December 31, 2015 | As a \% of Last Year's AAL |
| :---: | :---: | :---: |
| (1) COLA Experience | 0 | 0.00\% |
| (2) Salary Experience | 1,861,999 | 0.06\% |
| (3) Retiree Mortality Experience | 1,181,891 | 0.04\% |
| (4) Other (turnover, retirement ages, service purchase, etc.) |  |  |
| (a) Unexpected Participant Pick Up | 6,288,584 | 0.20\% |
| (b) Unexpected Data Change for Decrementing Actives | $(631,332)$ | -0.02\% |
| (c) Unexpected Data Change for Continuing Inactives | 221,764 | 0.01\% |
| (d) Unexpected Rehires | $(664,375)$ | -0.02\% |
| (e) Miscellaneous | 1,250,352 | 0.04\% |
| (f) Total | 6,464,993 | 0.20\% |
| (5) Active Decrements | 6,335,085 | 0.20\% |
| (6) New Entrants | 5,006,616 | 0.16\% |
| (7) Liability (Gain) or Loss During Year, $(1)+(2)+(3)+(4)(f)+(5)+(6)$ | 20,850,584 |  |
| (8) Investment Experience | 146,604,099 | 4.60\% |
| (8) Asset Valuation Method | 0 | 0.00\% |
| (10) Assumption and Method Changes | 0 | 0.00\% |
| (11) Benefit Changes | 0 | 0.00\% |
| (12) Other | 0 | 0.00\% |
| (13) Total (Gain) or Loss During Year, $(7)+(8)+(9)+(10)+(11)+(12)$ | 167,454,683 | 5.26\% |

Section 1.5 - History of UAAL and Funded Ratio
(\$'s in 000's)

| Valuation Date | Actuarial Accrued <br> Liability (AAL) | Actuarial Value of <br> Assets (AVA) | Funded Ratio <br> (AVA as a \% of <br> AAL) | Unfunded Actuarial <br> Accrued Liability <br> (UAAL) |
| :---: | :---: | ---: | ---: | ---: |
| January 1, 2016 | $3,267,121$ | $1,743,216$ | $53.36 \%$ | $1,523,904$ |
| January 1, 2015 | $3,186,187$ | $1,855,912$ | $58.25 \%$ | $1,330,275$ |
| January 1, 2014 | $3,105,567$ | $1,892,714$ | $60.95 \%$ | $1,212,853$ |
| January 1, 2013 | $2,867,335$ | $1,702,788$ | $59.39 \%$ | $1,164,547$ |
| January 1, 2012 | $2,808,184$ | $1,662,196$ | $59.19 \%$ | $1,145,988$ |
| January 1, 2011 | $2,724,191$ | $1,909,967$ | $70.11 \%$ | 814,224 |
| January 1, 2010 | $2,588,462$ | $1,936,849$ | $74.83 \%$ | 651,613 |
| January 1, 2009 | $2,632,356$ | $1,995,953$ | $75.82 \%$ | 636,403 |
| January 1, 2008 | $2,531,440$ | 941,864 | $37.21 \%$ | $1,589,576$ |
| January 1, 2007 | $2,466,106$ | $1,007,305$ | $40.85 \%$ | $1,458,801$ |

Section 1.6 - Solvency Test - Comparative Summary of Accrued Liability and Actuarial Value of Assets

|  | Accrued Liability for: |  |  |  | Portion of Accrued Liability <br> Covered by Actuarial Value of <br> Assets |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Valuation <br> as of <br> January 1 | (1) <br> Active Member <br> Contributions | (2) <br> Reneficiarees, <br> and Disabled | (3) <br> Active Member <br> (Employer Financed <br> Portion) | (3) <br> Actuarial Value of <br> Assets |  | (1) | $(2)$ |
| 2016 | $417,390,393$ | $2,216,132,003$ | $633,598,241$ | $1,743,216,432$ | $100.00 \%$ | $59.83 \%$ | $0.00 \%$ |
| 2015 | $379,907,286$ | $2,166,525,560$ | $639,753,826$ | $1,855,912,051$ | $100.00 \%$ | $68.13 \%$ | $0.00 \%$ |

## Section 2 <br> Plan Assets

## Section 2.1 - Statement of Net Plan Assets

(\$'s in 000's)

|  | As of December 31 |  |
| :--- | ---: | ---: |
|  | 2015 | 2014 |
| ASSETS |  |  |
| 1. Total investments, at fair value | $1,728,747$ | $1,842,308$ |
| 2. Invested securities lending cash collateral | 192,405 | 257,370 |
| 3. Receivables: |  |  |
| a. Employer contributions | 7,943 | 7,975 |
| b. Employee contributions | 5,652 | 5,669 |
| c. Securities sold, but not received | 4,735 | 2,717 |
| d. Accrued interest and dividends | 2,125 | 2,253 |
| e. Other | 1,420 | 1,668 |
| 4. Total assets | $1,943,027$ | $2,119,960$ |
| LIABILITIES | 192,405 |  |
| 1. Payable upon return of securities | 3,574 | 257,370 |
| 2. Accounts payable | 106 | 3,964 |
| 3. Other payables | $\mathbf{3 , 7 2 6}$ | 75 |
| 4. Securities purchased, but not paid | 199,811 | 2,639 |

## Section 2.2 - Changes in Net Plan Assets

(\$'s in 000's)

|  | As of December 31 |  |
| :---: | :---: | :---: |
|  | 2015 | 2014 |
| ADDITIONS |  |  |
| 1. Net investment (loss) income | 8,230 | 78,662 |
| 2. Employer contributions | 82,800 | 82,268 |
| 3. Employee contributions | 58,993 | 58,566 |
| 4. Other income | 0 | $\underline{0}$ |
| Total additions | 150,023 | 219,496 |
| DEDUCTIONS |  |  |
| 1. Benefit payments | 253,788 | 246,038 |
| 2. Contribution refunds, including interest | 6,354 | 7,137 |
| 3. Administrative expenses | $\underline{2,577}$ | 3,123 |
| Total liabilities | 262,719 | 256,298 |
| NET ASSETS HELD IN TRUST FOR PLAN BENEFITS |  |  |
| 1. Beginning of year | 1,855,912 | 1,892,714 |
| 2. Net (decrease) increase | $(112,696)$ | $(36,802)$ |
| End of year | 1,743,216 | 1,855,912 |

## Section 2.3-Actuarial Value of Assets

The actuarial value of assets is the market value as of January 1, 2016 of \$1,743,216,432.

Section 2.4 - Historical Asset Rate of Return

| Year Ending December 31 | Actuarial Value Annual <br> Recognized Rate of Return | Fair Value Annual Market <br> Rate of Return |
| :---: | :---: | :---: |
| 2015 | $-0.20 \%^{1}$ | $-0.20 \%^{1}$ |
| 2014 | $4.80 \%^{1}$ | $4.80 \%^{1}$ |
| 2013 | $19.50 \%^{1}$ | $19.50 \%^{1}$ |
| 2012 | $11.27 \%^{1}$ | $11.27 \%^{1}$ |
| 2011 | $3.13 \%{ }^{1}$ | $3.13 \%{ }^{1}$ |

${ }^{1}$ As reported by the Plan.

Section 2.5 - Forecast of Expected Benefit Payments

| Year Ending <br> December 31 | Active Members | Inactive Members | Total Payments |
| :---: | :---: | :---: | :---: |
| 2016 | 9,725,615 | 252,636,987 | 262,362,602 |

## Section 3 Accounting Information

## Section 3.1 - Actuarial Methods and Assumptions for GASB 67/68 Disclosure Purposes

The total pension liability as of December 31, 2015 was determined by rolling forward the total pension liability as of January 1, 2015 to December 31, 2015 using the following actuarial methods and assumptions, applied to all periods included in the measurement. All other assumptions such as retirement rates, termination rates, and disability rates used to determine the total pension liability are set forth in Section 6 - Basis of the Actuarial Valuation.

Valuation Date:

Actuarial Cost Method:

Amortization Method:

Mortality:

Experience Study:

January 1, 2015

Entry Age Normal - Level Percentage of Pay

For pension expense; the difference between expected and actual liability experience and changes of assumptions are amortized over the average of the expected remaining service lives of all members. The difference between projected and actual earnings is amortized over a closed period of five years.

Healthy pensioners: RP2000 Blue Collar Table, base year 2000 fully generational based on Scale BB
Active members: RP2000 Blue Collar Table, base year 2000 fully generational based on Scale BB.

The actuarial assumptions used were based on the results of an actuarial experience study for the period January 1, 2008 through December 31, 2013.

## Section 3.2 - Schedule of Expected Changes in Net Pension Liability as of

December 31, 2015
The GASB Statement No. 67 Change in Net Pension Liability

| Fiscal Year Ending | Dec. 31, 2015 |  | Dec. 31, 2014 |  |
| :---: | :---: | :---: | :---: | :---: |
| Total Pension Liability |  |  |  |  |
| Service Cost | \$ | 51,357,649 | \$ | 49,066,078 |
| Interest |  | 264,578,983 |  | 259,592,822 |
| Changes of Benefit Terms |  | - |  |  |
| Difference between Expected and Actual Experience |  | 13,082,408 |  |  |
| Change of Assumptions |  |  |  |  |
| Benefit Payments, including Refund of Member Contributions |  | (260,141,627) |  | $(246,037,562)$ |
| Net Change in Total Pension Liability |  | 68,877,413 |  | 62,621,338 |
| Total Pension Liability - Beginning of Year | \$ | 3,283,153,697 | \$ | 3,220,532,359 |
| Total Pension Liability - End of Year | \$ | 3,352,031,110 | \$ | 3,283,153,697 |
| Plan Fiduciary Net Position |  |  |  |  |
| Employer Contributions | \$ | 82,799,918 | \$ | 82,268,465 |
| Member Contributions |  | 58,993,284 |  | 58,566,279 |
| Net Investment Income |  | 8,230,003 |  | 71,524,132 |
| Benefit Payments, including Refund of Member |  |  |  |  |
| Contributions |  | $(260,141,627)$ |  | $(246,037,562)$ |
| Administrative Expenses Other |  | $(2,577,197)$ |  | $(3,123,365)$ |
| Other |  | - |  | - |
| Net Change in Plan Fiduciary Net Position |  | $(112,695,619)$ |  | $(36,802,051)$ |
| Plan Fiduciary Net Position - Beginning of Year | \$ | 1,855,912,051 | \$ | 1,892,714,102 |
| Plan Fiduciary Net Position - End of Year | \$ | 1,743,216,432 | \$ | 1,855,912,051 |

## Section 3.3 - Net Pension Liability (Asset)

The GASB Statement No. 67 Net Pension Liability

| Net Pension Liability (Asset) |  |  |
| :---: | :---: | :---: |
| Valuation Date | December 31, 2015 | December 31, 2014 |
| Total Pension Liability | \$ 3,352,031,110 | \$ 3,283,153,697 |
| Plan Fiduciary Net Position | 1,743,216,432 | 1,855,912,051 |
| Net Pension Liability (Asset) | \$ 1,608,814,678 | \$ 1,427,241,646 |
| Plan Fiduciary Net Position as a Percentage of the Total Pension Liability (Asset) | 52.00\% | 56.53\% |

## Section 3.4 - Sensitivity

The GASB Statement No. 67 Sensitivity of Net Pension Liability

| Sensitivity of the Net Pension Liability <br> to Changes in the Discount Rate |  |  |  |
| :--- | :---: | :---: | :---: |
| December 31, 2015 | 1\% Decrease | Current | 1\% Increase |
| Discount Rate | $7.25 \%$ | $8.25 \%$ | $9.25 \%$ |
| Net Pension Liability (Asset) | $\$ 1,937,758,642$ | $\$ 1,608,814,678$ | $\$ 1,327,140,187$ |

The discount rate used to measure the total pension liability was $8.25 \%$. The projection of cash flows used to determine the discount rate assumed that the System's contributions will continue to follow the current funding policy. Based on those assumptions, the System's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members.

## Section 3.5 - Pension Expense

The GASB Statement No. 68 Pension Expense

| Pension Expense |  |  |
| :--- | ---: | ---: |
| Measurement Year Ending | Dec. 31, 2015 | Dec. 31, 2014 |
| Service Cost | $\$$ | $51,357,649$ |
| Interest | $\$$ | $49,066,078$ |
| Difference between Expected and Actual Experience | $264,578,983$ | $259,592,822$ |
| Change of Assumptions | $2,894,338$ | - |
| Member Contributions | - | - |
| Projected Earnings on Plan Investments | $(58,993,284)$ | $(58,566,279)$ |
| Difference between Expected and Actual Earnings | $(148,223,407)$ | $(151,680,458)$ |
| Administrative Expense | $44,029,946$ | $16,031,265$ |
| Other | $2,577,197$ | $3,123,365$ |
| Changes of Benefit Terms | - | - |
| Total Pension Expense | - | - |

## Notes to Schedule:

Valuation Date: Actuarially determined contribution rates are calculated as of January 1 , one year prior to the end of the fiscal year in which contributions are reported

## Methods and assumptions used to determine the 2015 contribution rates:

| Actuarial Cost Method | Entry Age Normal |
| :--- | :--- |
| Amortization Method | Level, open |
| Remaining amortization period | 20 years with $2 \%$ escalator |
| Asset valuation method | Market |
| Inflation | $3.25 \%$ |
| Salary increases | 5 year select and ultimate at 4.00\%, including inflation |
| Investment rate of return | $8.25 \%$, net of pension plan investment expenses, including inflation |
| Retirement Age | In the 2014 actuarial valuation, expected retirement ages of plan members were adjusted to more closely |
|  | reflect actual experience |
| Mortality | RP2000 Blue Collar Table, base year 2000 fully generation using scale BB. |

## Other information:

Beginning in 2015, the Actuarial cost method was changed from Projected Unit Credit to Entry Age Normal; the Amortization period was changed to 20 years with a $2 \%$ escalator from 30 years with no escalator.

The demographic assumptions were updated in 2014 to bring the assumptions more in line with actual plan experience

## Section 4

 Actuarial Funding Projections
## Section 4.1 - Projection Assumptions and Methods

## Key Assumptions

- $8.25 \%$ investment return on the Fair Value of Assets in all future years.
- The Actuarial Value of Assets is the Market Value of Assets.
- Actuarial assumptions and methods as described in Section 6. All future demographic experience is assumed to be exactly realized.
- The actuarially calculated contribution is contributed each year.
- Projections assume a 0\% increase in the total active member population. All new future members are expected to enter the plan after 12 months of continuous service and contribution rates are determined as a percent of total payroll.

## Section 6

Basis of the Actuarial Valuation

## Section 6.1 - Summary of Plan and Contribution Provisions

Eligibility—All full-time permanent employees of the Chicago Transit Authority are included in the Plan after completing 12 months of continuous service unless specifically excluded by the terms of a collective bargaining agreement. Exempt non-vested employees may opt out of the plan. Chicago Transit Authority Board members are not included.

Contributions-The Chicago Transit Authority will contribute a percent of compensation for all participating employees and each participating employee will contribute a percent of his compensation to the Plan:

| Annual Contributions to the Plan (Percentage of Compensation) |  |
| :---: | :---: |
| Authority | Employees |
| $14.250 \%$ | $10.125 \%$ |

For years through 2040, the amount paid by the Authority with respect to debt service on bonds issued for contribution to the Retirement Plan shall be treated as a credit against the amount of required contribution up to an amount not to exceed six percent of compensation paid by the Authority in the following year. The amount paid in debt service is always greater than six percent of projected compensation.

In order to be eligible for the credit, the debt service payment may not be paid with the proceeds of bonds or notes issued by the CTA for any calendar year after 2008. Buck has confirmed that the debt service payment for the year triggering the credit was not paid with the proceeds of bonds or notes issued by the CTA for any calendar year after 2008.

Minimum contributions as set forth elsewhere in this report may also apply.

Normal Retirement-The normal retirement age is 65. For employees retiring on or after January 1, 2001 the annual normal retirement pension is equal to the sum of (a) and (b) below, but not greater than $70.0 \%$ of the employee's average annual compensation:
(a) $1 \%$ of the employee's past service compensation as of May 31,1948 , for each full year of continuous service prior to June 1, 1949, plus
(b) $2.15 \%$ of average annual compensation for each year (and fraction of completed calendar months) of continuous service after June 1, 1949.

Average annual compensation is equal to the highest average compensation over any four calendar years out of the final 10 calendar years prior to normal retirement (or actual retirement, if later). If an employee has at least 20 years of service, his minimum annual pension is $\$ 2,220$.

## Section 6.1 - Summary of Plan and Contribution Provisions (continued)

## Early Retirement:

Employees hired before January 18, 2008: An employee may retire early after attaining age 55 and completing at least three years of continuous service, or after completion of 25 years of continuous service. The early retirement pension is equal to the accrued normal retirement pension based on compensation and service at early retirement, reduced by $5 \%$ for each year or fraction younger than age 65 . The $5 \%$ per year reduction is not applied if the employee has at least 25 years of service. Employees hired after September 5, 2001 may retire early with unreduced benefits after attaining age 55 and completing at least 25 years of service.

Employees hired on and after January 18, 2008: An employee may retire with unreduced benefits upon attainment of age 64 with 25 years of service. An employee may retire with a benefit reduced as described above upon attainment of age 55 with 10 years of continuous service.

## Disability Allowance:

An employee is eligible for a disability allowance if he becomes disabled after completing 10 years of service, or if his disability after completing five years of service is covered under the Workmen's Compensation Act. An employee is disabled if he either (a) is totally and permanently disabled or (b) is unable to return to work at their same job after receiving 26 weeks of benefits under the Authority's Group Accident and Sickness Insurance or from the Authority under the Workmen's Compensation Act. The disability allowance is equal to the normal retirement pension based on compensation and service at disability subject to a minimum annual pension of \$4,800.

## Death Benefits:

If an employee dies prior to retirement or disability and after one year of service, his contributions, accumulated with interest, are paid to his beneficiary. "Interest" is equal to the rate of interest earned by the Fund (to a maximum of $2 \%$ ) prior to January $1,1971,1 / 2$ of the rate of interest earned by the Fund (to a maximum of $3 \%$ ) between January 1, 1971, and January 1, 1980, and 3\% after December 31, 1979. If an employee dies after 90 days of service but prior to one year of service, his contributions, without interest, are paid to his beneficiary; and if he dies prior to 90 days of service, his contributions are not refunded.

If an employee is eligible for early retirement, he is automatically covered by a surviving spouse benefit, payable upon his death prior to retirement, in lieu of a return of his contributions. The spouse benefit is equal to $1 / 2$ of the pension which would have been payable to the employee if he had retired on the first day of the month of his death and had elected an optional form of pension providing $1 / 2$ of his reduced pension to his surviving spouse. Employees may elect not to be covered by this option and provide for the payment of their contributions with interest to their beneficiary in lieu thereof.

If an employee dies after his retirement pension has commenced, his beneficiary receives the excess, if any, of his contributions, accumulated with interest to his retirement date, over the sum of the pension payments made to him. However, if his surviving spouse is entitled to a pension after his death, such excess will not be paid to his beneficiary. At the death of the surviving spouse, the excess, if any, of the contributions accumulated with interest to his retirement date over the sum of the pension payments made to him and his surviving spouse will be paid.

## Section 6.1 - Summary of Plan and Contribution Provisions (continued)

A retired employee's beneficiary will receive a death benefit equal to the amount from the following schedule according to the employee's age and service at retirement:

| Age | Service | Age + Service | Death Benefit |
| :---: | :---: | :---: | :---: |
| 65 | 20 | N/A | $\$ 8,000$ |
| 60 | N/A | 90 | $\$ 8,000$ |
| N/A | 25 | N/A | $\$ 8,000$ |
| N/A | N/A | 94 | $\$ 8,000$ |
| $60-64$ | 20 | N/A | $\$ 6,000$ |
| $55-59$ | 20 | N/A | $\$ 5,000$ |
| All Others |  |  | $\$ 2,000$ |

## Termination Benefits:

If an employee terminates his employment prior to eligibility for retirement or disability and after completing one year of service, he receives a refund of his contributions plus interest (3\% after December 31, 1979). If he terminates after 90 days but prior to one year, he receives his contributions without interest, and if he terminates less than 90 days after hire, he receives no refund. If an employee has completed 10 years of continuous service and elects to leave his contributions in the Plan, he remains entitled to his normal retirement pension beginning at age 65 but based on his compensation and service at termination.

## Optional Benefit Forms:

In lieu of a normal pension, an employee may elect an optional annuity of equivalent actuarial value providing payments of $1 / 2,2 / 3$, or all of his reduced pension to his spouse after his death (Option A). Alternatively, an employee may elect an optional annuity of equivalent actuarial value providing payments of $1 / 2$, $2 / 3$, or all of his reduced pension to his spouse after his death with the further provision that his benefit will be restored to the full amount to him after the death of his spouse (Option B).

## Retired Employees:

Benefits for retired employees have been valued according to benefits in effect at time of retirement as modified by subsequent amendments. Such benefits are kept on records maintained by the Authority.

## Voluntary Early Retirement Incentive Program:

During 1997, the Plan was amended to offer enhanced retirement benefits to all employees who have at least 25 years of continuous service on or before December 31, 1999, and who have not retired prior to January 1, 1997. Those eligible on or before June 30, 1997 must elect to participate during the period March 1, 1997, to June 30, 1997. Employees eligible during the period July 1, 1997, to December 31, 1999, must elect to participate between July 1, 1997, and February 28, 1998. All eligible employees who elect to participate must retire no later than December 31, 1999. The benefit is determined based on a formula multiplier of $2.40 \%$ of average annual compensation with the benefit cap at $70.0 \%$ of such average annual compensation.

## Section 6.1 - Summary of Plan and Contribution Provisions (continued)

## Ad hoc increases in retiree benefits:

As part of the Arbitration Award ruling of November 13, 2003, the following ad hoc increases were given to retirees in payment status as of January 1, 2000:
(a) $\$ 75$ per month for members retired before January 1,1980
(b) $\$ 50$ per month for members who retired on or after January 1, 1980, but before January 1, 1991
(c) $\$ 40$ per month for members who retired on or after January 1, 1991, but before January 1, 2000

As part of an Arbitration Award ruling of June 26, 2007, another ad hoc adjustment was made for participants.

## Contribution Requirements Under P.A. 95-0708

Beginning January 18, 2008, the Authority shall make contributions to the Retirement Plan in an amount equal to 12 percent of compensation and participating employees shall make contributions in an amount equal to six percent of compensation. For years through 2040, the amount paid by the Authority with respect to debt service on bonds issued for contribution to the Retirement Plan shall be treated as a credit against the amount of required contribution, up to an amount not to exceed six percent of compensation paid by the Authority in the following year.

If the funded ratio is projected to decline below 60 percent in any year before 2040 using reasonable actuarial assumptions and the projected unit credit funding method, the contribution shall be increased so that the funded ratio is not projected to drop below 60 percent. If the funded ratio actually drops below 60 percent in any year before 2040, the contribution shall be increased so that the funded ratio is projected to reach 60 percent within 10 years. The increase in contributions shall be effective as of the January 1 following the determination, or 30 days following the determination, whichever is later. One-third of the increase in contributions shall be paid by participating employees and two-thirds by the Authority.

Beginning in 2040, the minimum contribution for each fiscal year shall be predetermined each year as the amount required to bring the total assets of the Retirement Plan up to 90 percent of the total actuarial liabilities by the end of 2059, using the projected unit credit funding actuarial cost method and reasonable actuarial assumptions. Participating employees shall be responsible for one-third of the required contribution and the Authority shall be responsible for two-thirds of the required contribution.

Beginning in 2060, the minimum contribution for each year shall be an amount needed to maintain the total assets of the Retirement Plan at 90 percent of the total actuarial liabilities of the Plan and the contribution shall be funded one-third by participating employees and two-thirds by the Authority.

## Section 6.2 - Description of Actuarial Methods and Valuation Procedures

## A. Actuarial Cost Method

Liabilities and contributions shown in this report are computed using the Projected Unit Credit Cost Method of funding.

Sometimes called a "funding method," this is a particular technique used by actuaries for establishing the amount and incidence of the annual actuarial cost of pension plan benefits, or normal cost, and the related unfunded actuarial accrued liability. Ordinarily the annual contribution to the plan is comprised of (1) the normal cost and (2) an amortization payment on the unfunded actuarial accrued liability.

Under the Projected Unit Credit Cost Method, the Normal Cost for the given year is computed as the present value of the unit of benefit attributable to that year for each active Member. The Normal Cost for the Plan is determined by summing individual results for each active Member.

The Actuarial Accrued Liability under this method at any point in time is equal to the present value of benefits accrued to the measurement date using a service pro-rate method.

The Unfunded Actuarial Accrued Liability is the excess of the Actuarial Accrued Liability over the Actuarial Value of Plan Assets actually on hand on the valuation date. The Unfunded Actuarial Accrued Liability is amortized as a level dollar amount over a fixed period of 30 years.

Under this method experience gains or losses, i.e. decreases or increases in accrued liabilities attributable to deviations in experience from the actuarial assumptions, adjust the Unfunded Actuarial Accrued Liability.

## Section 6.2 - Description of Actuarial Methods and Valuation Procedures (continued)

## B. Asset Valuation Method

The actuarial value of assets equals the market value of assets.

## C. Valuation Procedures

No actuarial liability is included for members who terminated non-vested prior to the valuation date, except those due a refund of contributions.

The compensation amounts used in the projection of benefits and liabilities were January 1, 2016 rates of pay provided by staff of the Retirement Board of Trustees.

No termination or retirement benefits were projected to be greater than the dollar limitation required by the Internal Revenue Code Section 415 for governmental plans.

Annual increases in salary were limited to the dollar amount defined under Internal Revenue Code Section 401(a)(17) for affected members.

## Section 6.3 - Summary of Actuarial Assumptions and Changes in Assumptions

Rate of Covered Pay: The rate of covered pay for participants has been estimated at \$573,548,196 for 2016. The following adjustments were made to the actual covered earnings for 2015 supplied by the Authority:
(a) No earnings or a fractional year of earnings were submitted for employees with a work status date in 2015 who were hired during 2014. We have annualized the 2015 earnings and assumed minimum earnings of $\$ 50,750$ per year for this group.
(b) For employees on layoff, extended leave of absence, or inactive status, we have assumed minimum earnings of $\$ 50,750$ per year.
(c) For all employees, 2016 salary was assumed to increase 1.50\% from 2015.

Retiree Benefits: The benefit amounts received for retirees were compared to information received from the Authority for the prior valuation.

Earnings on Plan Assets: 8.25\% per annum, compounded annually.

Salary Inflation: 3.25\%
Compensation Increases: According to the following table, compounded annually, assumed end of year (includes inflation):

| Years of Service | Rate |
| :---: | :---: |
| 1 | $9.00 \%$ |
| 2 | $11.00 \%$ |
| 3 | $16.00 \%$ |
| 4 | $5.00 \%$ |
| $>=5$ | $4.00 \%$ |

## Mortality:

(a) Active Members - RP2000 Blue Collar Table, base year 2000 fully generational based on Scale BB.
(b) Retirees \& Survivors - RP2000 Blue Collar Table, base year 2000 fully generational based on Scale BB.
(c) Disabled Employees - RP2000 Disabled Table, base year 2000 fully generational based on Scale BB.

## Section 6.3 - Summary of Actuarial Assumptions and Changes in Assumptions

 (continued)Withdrawals from Service: According to the following table shown for illustrative ages:

| Age | Rates of Termination for Reasons Other <br> than Death or Disability |
| :---: | :---: |
| 25 | $7.00 \%$ |
| 30 | $5.10 \%$ |
| 35 | $4.10 \%$ |
| 40 | $2.90 \%$ |
| 45 | $2.40 \%$ |
| 50 | $1.90 \%$ |
| $55 \&$ Older | $0.00 \%$ |

If service is 25 or greater, no withdrawal is assumed.
Recovery from disability without returning to work: Disabled members are assumed to recover according to the following table as shown for illustrative ages:

| Sample <br> Attained <br> Ages | Disabled Recovery ${ }^{1}$ <br>  <br>  <br> Men |  |
| :---: | :---: | :---: |
| 30 | $0.412 \%$ | $0.461 \%$ |
| 35 | $0.406 \%$ | $0.447 \%$ |
| 40 | $0.382 \%$ | $0.422 \%$ |
| 45 | $0.326 \%$ | $0.393 \%$ |
| 50 | $0.216 \%$ | $0.343 \%$ |
| 55 | $0.013 \%$ | $0.248 \%$ |
| 60 | $0.000 \%$ | $0.012 \%$ |
| 65 | $0.000 \%$ | $0.000 \%$ |
| 70 | $0.000 \%$ | $0.000 \%$ |
| 75 | $0.000 \%$ | $0.000 \%$ |
| 80 | $0.000 \%$ | $0.000 \%$ |

1. Disability recovery after verification of the ability to return to work in the same position as determined by the Plan's Disability manager.

Section 6.3 - Summary of Actuarial Assumptions and Changes in Assumptions (continued)

Disability Allowance: According to the following table as shown for illustrative ages:

| Age | Rate of Disability |
| :---: | :---: |
| 25 | $0.10 \%$ |
| 30 | $0.10 \%$ |
| 35 | $0.20 \%$ |
| 40 | $0.30 \%$ |
| 45 | $0.40 \%$ |
| 50 | $0.50 \%$ |
| 55 | $0.60 \%$ |
| 60 | $0.70 \%$ |
| $65 \&$ older | $0.78 \%$ |

Section 6.3 - Summary of Actuarial Assumptions and Changes in Assumptions (continued)

## Service Retirements:

| Age | Pre 1/19/2008 Hires <br> Probability of Retirement |  | Post 1/18/2008 Hires <br> Probability of Retirement |  |
| ---: | ---: | ---: | ---: | ---: |
|  | Service<25 | Service>25 | Service<25 | Service>25 |
| $45-54$ | $0.00 \%$ | $20.00 \%$ | $0.00 \%$ | $0.00 \%$ |
| 55 | $1.50 \%$ | $20.00 \%$ | $1.50 \%$ | $1.50 \%$ |
| 56 | $1.50 \%$ | $22.50 \%$ | $1.50 \%$ | $1.50 \%$ |
| 57 | $2.00 \%$ | $25.00 \%$ | $2.00 \%$ | $2.00 \%$ |
| 58 | $2.00 \%$ | $27.50 \%$ | $2.00 \%$ | $2.00 \%$ |
| 59 | $2.00 \%$ | $30.00 \%$ | $2.00 \%$ | $2.00 \%$ |
| 60 | $2.50 \%$ | $32.50 \%$ | $2.50 \%$ | $2.50 \%$ |
| 61 | $4.00 \%$ | $35.00 \%$ | $4.00 \%$ | $4.00 \%$ |
| 62 | $15.00 \%$ | $37.50 \%$ | $20.00 \%$ | $20.00 \%$ |
| 63 | $15.00 \%$ | $40.00 \%$ | $15.00 \%$ | $15.00 \%$ |
| 64 | $20.00 \%$ | $42.50 \%$ | $15.00 \%$ | $15.00 \%$ |
| 65 | $30.00 \%$ | $45.00 \%$ | $60.00 \%$ | $60.00 \%$ |
| 66 | $30.00 \%$ | $45.00 \%$ | $25.00 \%$ | $25.00 \%$ |
| 67 | $30.00 \%$ | $45.00 \%$ | $25.00 \%$ | $25.00 \%$ |
| 68 | $30.00 \%$ | $45.00 \%$ | $25.00 \%$ | $25.00 \%$ |
| 69 | $30.00 \%$ | $45.00 \%$ | $25.00 \%$ | $25.00 \%$ |
| $70-74$ | $30.00 \%$ | $45.00 \%$ | $30.00 \%$ | $30.00 \%$ |
| 75 | $100.00 \%$ | $100.00 \%$ | $100.00 \%$ | $100.00 \%$ |

Spouse Data: 75\% of employees eligible at retirement are assumed to be married, $50 \%$ of those married are assumed to elect a spouse option (Option A-50\%) and the average equivalency factor to convert their accrued pension to a spouse option (Option A-50\%) is assumed to be $85 \%$. A wife is assumed to be 3 years younger than her husband. Actual dependent coverage data was used for participants retired as of the valuation date.

Section 6.3 - Summary of Actuarial Assumptions and Changes in Assumptions (continued)

Miscellaneous and Technical Assumptions:

| Pay Increase Timing: | End of (Fiscal) year. |
| :--- | :--- |
| Decrement Timing: | Decrements of all types are assumed to occur mid-year. |
| Eligibility Testing: | Eligibility for benefits is determined based upon the age nearest birthday and <br> service nearest whole year on the date the decrement is assumed to occur. |
| Benefit Service: | Exact fractional service from date of participation is used to determine the <br> amount of benefit payable. |
| Decrement Relativity: | Decrement rates are used directly based on assumptions, without adjustment <br> for multiple decrement table effects. |
| Decrement Operation: | Disability and turnover do not operate after 25 years of service. |

## Summary of changes since January 1, 2015 Valuation

All assumptions and methods used for this valuation are unchanged from the prior valuation.

## Glossary of Terms

| Actuarial Accrued Liability | Total accumulated cost to fund pension benefits arising from <br> service in all prior years. |
| :--- | :--- |
| Actuarial Cost Method | Technique used to assign or allocate, in a systematic and <br> consistent manner, the expected cost of a pension plan for a <br> group of plan members to the years of service that give rise to <br> that cost. |
| Actuarial Present Value |  |
| of Future Benefits | Amount which, together with future interest, is expected to be <br> sufficient to pay all future benefits. |
| Actuarial Valuation | Study of probable amounts of future pension benefits and the <br> necessary amount of contributions to fund those benefits. |
| Actuary | Person who performs mathematical calculations pertaining to <br> pension and insurance benefits based on specific procedures and <br> assumptions. |
| Annual Required Contribution | Disclosure measure of annual pension cost. |
| Normal Cost | That portion of the actuarial present value of benefits assigned to <br> a particular year in respect to an individual participant or the plan <br> as a whole. |
| Accrued Liability (UAAL) | The portion of the actuarial accrued liability not offset by plan <br> assets. |

[^0]:    ${ }^{1}$ Contribution rate applicable for the plan year following the year of valuation.

[^1]:    ${ }^{1 .}$ Excludes health care assets.

[^2]:    ${ }^{1}$ Active statistics include all participants who are actively employed which includes 19 participants who are on leave and 49 participants who have opted out of participating in the Plan and are only entitled to a return of their contributions.
    ${ }^{2}$ The salary information for the 49 participants who have opted out of participating in the Plan is not included.
